applied catalysis

AN INTERNATIONAL JOURNAL DEVOTED TO CATALYTIC SCIENCE AND ITS APPLICATIONS

VOL. 37, NO. 1–2 **CONTENTS** **FEBRUARY 15, 1988**

(Abstracts/Contents Lists published in API Abstracts/Catalysts & Catalysis, Chemical Abstracts, Current Contents/Physical, Chemical & Earth Sciences, Current Contents/Engineering, Technology & Applied Sciences, Engineering Index, Metals Abstracts, Science Citation Index, Theoretical Chemical Engineering Abstracts, Automatic Subject Citation Alert and SCISEARCH)

Acidic ferrierite type zeolite. I. Physicochemical and catalytic properties
Y.S. Jin, A. Auroux and J.C. Vedrine (Villeurbanne, France) 1

Acidic ferrierite type zeolite. II. Steamed and acid leached treatment
Y.S. Jin, A. Auroux and J.C. Vedrine (Villeurbanne, France) 21

Catalytic hydrogenation of carbon monoxide to alkenes over partially degraded iron complexes. I. Unsupported iron catalysts
R. Snel (Pretoria, South Africa) 35

Adsorption of pyridine and ammonia on heteropoly compounds and catalytic activity in the methyl t-butyl ether synthesis reaction
J.-S. Kim, J.-M. Kim, G. Seo and N.-C. Park (Kwangju, Korea) and H. Niiyama (Tokyo, Japan) 45

Mössbauer and X-ray studies of the structure of iron–manganese oxide catalyst precursors
B. Kolk and A. Albers (Johannesburg, South Africa) and I.R. Leith and M.G. Howden (Pretoria, South Africa) 57

Temperature-programmed reduction of mixed iron-manganese oxide catalysts in hydrogen and carbon monoxide
I.R. Leith and M.G. Howden (Pretoria, South Africa) 75

Measurement of active phase dispersion in molybdenum sulfide/carbon catalysts using toluene chemisorption
G.M.K. Abotsi, A.W. Scaroni and F.J. Derbyshire (University Park, PA, U.S.A.) 93

Effect of partial reduction on the formation of oxygenated compounds in the hydrogenation of carbon monoxide on rhodium/alumina
D. Duprez, J. Barrault and C. Geron (Poitiers, France) 105

Hydrogenation of carbon dioxide over Co-$AlPO_4$-5
R.A. Migone, M.A. Ulla, E.A. Lombardo and J.O. Petunchi (Santa Fe, Argentina) 115

Kinetics of the synthesis of bisphenol A
K. Jeřábek, J. Odnoha and K. Setínek (Prague, Czechoslovakia) 129

Formation of ethene and propene from methanol on zeolite ZSM-5. I. Investigation of rate and selectivety in a batch reactor
D. Prinz and L. Riekert (Karlsruhe, F.R.G.) 139

Formation of ethene and propene from methanol on zeolite ZSM-5. II. Preparation of finished catalysts and operation of a fixed-bed pilot plant
U. Hammon, M. Kotter and L. Riekert (Karlsruhe, F.R.G.) 155

(continued overleaf)

(contents continued)

Electrochemically controlled deposition–precipitation of copper/silica catalysts
P.C.M. van Stiphout, A.J. van Dillen and J.W. Geus (Utrecht, The Netherlands) 175

Electrochemically controlled deposition–precipitation of copper–nickel/silica
P.C.M. van Stiphout, C.R. Bayense and J.W. Geus (Utrecht, The Netherlands) 189

Combination of ethylbenzene dehydrogenation and carbon dioxide shift-reaction over a sodium oxide/alumina catalyst
S. Sato, M. Ohhara, T. Sodesawa and F. Nozaki (Chiba, Japan) 207

Hexane–carbon dioxide reaction catalyzed by alkaline earth oxides. I. Catalytic behaviour and intermediate
M. Matsukata, S. Sekine, K. Kobayashi, E. Kikuchi and Y. Morita (Tokyo, Japan) 217

Effect of catalyst preparation on catalytic activity, VII. The chemical structures on nickel/alumina catalysts: their impact on the formation of metal–support interactions
Y.-J. Huang and J.A. Schwarz (Syracuse, NY, U.S.A.) and J.R. Diehl and J.P. Baltrus (Pittsburgh, PA, U.S.A.) 229

Oxygen spillover and its possible role in coke burning
E. Baumgarten and A. Schuck (Düsseldorf, F.R.G.) 247

Application of laser diagnostic techniques to the catalytic oxidation of carbon monoxide in a tubular wall reactor
W.A. England (Didcot, U.K.), A. Gilmore (Bath, U.K.), D.A. Greenhalgh (Didcot, U.K.), W.J. Thomas and U. Ullah (Bath, U.K.) and S.T. Whittley (Didcot, U.K.) 259

Parameters affecting the optimal synthesis of zeolite ZSM-20
N. Dewaele, L. Maistriau, J.B. Nagy, Z. Gabelica and E.G. Derouane (Namur, Belgium) 273

Activitation of copper–cerium intermetallic catalyst precursors by temperature-programmed oxidation
C.M. Hay and J.R. Jennings (Middlesbrough, U.K.), R.M. Lambert and R.M. Nix (Cambridge, U.K.), G. Owen (Runcorn, U.K.) and T. Rayment (Cambridge, U.K.) 291

Kinetic study of the ammoxidation of methylpyrazine to cyanopyrazine
L. Forni (Milan, Italy) 305

Formation of 2-ethyl acrolein by gas phase aldol condensation
G. Albanesi and P. Moggi (Parma, Italy) 315

Surface properties of co-precipitated V-Ti-O catalysts and their relation to the selective oxidation of isobutene
J.L.G. Fierro, L.A. Arrua, J.M. Lopez Nieto and G. Kremenic (Madrid, Spain) 323

Short communications

Amorphous nickel–phosphorus alloy deposited on a support and its hydrogenation activity
D. Jingfa and Z. Xiping (Shanghai, Peoples Republic of China) and M. Enze (Beijing, Peoples Republic of China) 339

Oxygenate formation over supported platinum with different dispersions and the effect of additives
L. Guczi, G. Stefler, K. Matusek and I. Bogyay (Budapest, Hungary) and S. Engels, H. Lausch, L. Schuster and M. Wilde (Merseburg, G.D.R.) 345

News Brief
Advances in catalytic technology 352
Meeting on inorganic membranes 352
Some recent papers 352
Recent Chem Comms on methane coupling 353
Chinese Journal of Catalysis 353
Professor R.B. Anderson 353
Award for Alfons Baiker 354
The Periodic Table 354
Catalysis Letters 354
IUPAC manuals on catalyst characterization 355
Organic reactions catalysis conference 355
French–Polish symposium on catalysis 356
Courses in X-ray methods 356
Post congress symposium on catalysis 356
Bicentenary Catalysis 1988 357
Some forthcoming meetings and courses 357
Calendar of Forthcoming Events 358
Book Review 359
Meeting Reports 360
Tailpiece 362

Author Index 365
Subject Index 368

In articles with more than one author, the name of the author to whom correspondence should be addressed is indicated in the article heading by a 6-pointed asterisk (*)
